

Benefits of Using Neste MY Renewable Diesel (RD)

- **RD Fuel is a Pure Hydrocarbon, not Bio-Diesel**
Certified as a ULSD (CARB) Diesel Fuel #2, meeting the ASTM D-975 specification.
- **High Performance Fuel**
With a high cetane number of 75-85 compared to conventional diesel at 45, RD fuel ensures a cleaner, more efficient and complete combustion.
- **Smaller Environmental Footprint – (CI Value on Average 34)**
Reduces greenhouse gas emissions by up to 80%, in addition to sizable reductions in NOx and tailpipe emissions. AB32 requires California to reduce GHG emissions to 1990 levels by 2020.
- **Lower Maintenance on DPF Filters**
With 30% less particulate matter, RD reduces regen time and operating costs.
- **Odorless and Colorless**
Sulphur-free, oxygen-free, and aromatics-free, looks water white and clear.
- **Superior Cold Weather Performance**
Suitable for very cold weather conditions. No need for fuel additives.
- **Easy Switch; No Additional Investments**
Fully compatible with conventional diesel, fleets can switch to RD diesel anytime.
- **Endorsed and Approved by the Major OEM's**

Who is Neste?

Neste Corporation is a refining and marketing company based in Finland, specializing in premium-quality, lower-emission traffic fuels. The company is the world's leading producer of renewable diesel.

Neste has operations in 14 countries worldwide and employs some 5,000 people. In 2014, the company's net sales stood at EUR 15 billion. Neste's shares are traded on the NASDAQ OMX Helsinki.

In North America, Neste has two offices located in Houston, Texas USA and Toronto, Ontario Canada.

Neste has selected Spartan Tank Lines as their Exclusive Distributor serving 12 counties of Central and Northern California, including the Bay Area.
